MARKET ENTRY STUDY

Baby and Toddler Products in Austria

Market size, key players, opportunities, market access requirements and a directory of importers, distributors and directly importing retailers for foreign suppliers of branded and private-label products

Product scope: all product groups presented at trade fairs such as Kind + Jugend (Cologne): baby equipment and nursery textiles, prams and strollers, car seats, baby and children's furniture, feeding and nursing, bath and care, safety products, baby carriers, baby and children's fashion, toys for babies and toddlers, ride-ons and outdoor products.

Language of study: English

Status of research: September 2026

1. Executive Summary

Austria is a small but affluent, high-value market for baby and toddler products. With roughly 9.2 million inhabitants, about 75,000–77,000 births per year and one of the highest purchasing-power levels in the EU, Austrian parents spend significantly above the EU average per child and show a strong preference for quality, safety test results and sustainability. The market is highly integrated with Germany: many retail chains are German-owned and buy centrally in Germany, most international brands serve Austria through their German (DACH) subsidiary or distributor, and German-language product information is mandatory.

Key findings for foreign suppliers:

- **Market size:** the total Austrian market for baby and toddler products in the Kind + Jugend scope (equipment, furniture, fashion 0–6 years, toys for 0–6 years, care and feeding accessories) is estimated at EUR 1.1–1.4 billion at retail prices. Baby apparel alone accounts for approx. EUR 126 million (2025), children's apparel overall for approx. EUR 1.2 billion.
- **Demographics:** births have declined for several years (76,873 in 2024; crude birth rate 8.2 per 1,000 in 2025, total fertility rate 1.29). Volume growth is therefore limited; growth comes from premiumisation, first-time-parent spending, grandparent gifting, tourism (Vienna, alpine regions) and replacement of products after regulatory changes (e.g. i-Size car seats).
- **Structure:** distribution is concentrated. Drugstores (dm, BIPA, Müller), food retail and discounters (SPAR, REWE/BILLA, HOFER, Lidl), the baby specialist chains (BabyOne, baby-walz), the toy superstore chain Smyths Toys, furniture groups (XXXLutz/Möbelix/mömax, IKEA), value fashion chains and Amazon account for the majority of sales, complemented by a network of independent specialist retailers.
- **Importer landscape:** there are only a few Austria-based full-range baby importers. Many brands are distributed by German DACH distributors or by the brands' own subsidiaries. For foreign suppliers, the most realistic routes are (a) direct listing with retail chains that import themselves (private label or brand), (b) Austrian toy and fashion distributors/agencies, and (c) a DACH distributor in Germany that also covers Austria.
- **Opportunities:** sustainable and organic textiles, wooden and Montessori toys, premium and lightweight travel strollers, e-strollers, reboarder car seats (i-Size), outdoor and alpine family products (bike trailers, child carriers, snow suits, sledges), kids' traditional wear (Tracht), smart safety products (video monitors), silicone/stainless feeding products and private-label programmes for discounters and drugstores.
- **Market access:** EU suppliers benefit from free movement of goods but must comply with EU product safety law (GPSR, toy safety, REACH, standards such as EN 71, EN 1888, UN R129), Austrian packaging and WEEE extended producer responsibility and German-language labelling. Non-EU suppliers additionally need an EU-based responsible economic operator, customs clearance (EORI, duties depending on origin and product) and import VAT of 20%.

2. Scope, Definitions and Methodology

This study covers products for children from birth to approximately six years of age, following the product structure of the Kind + Jugend trade fair in Cologne. The following product groups are included:

- **On the move:** prams, pushchairs, buggies, travel systems, twin/sibling strollers, e-strollers, bike trailers, pram accessories (footmuffs, rain covers, parasols).
- **Car safety:** infant carriers, reboarders, child car seats according to UN R129 (i-Size), booster seats, ISOFIX bases.
- **Nursery furniture and sleep:** cots, bedside cribs, travel cots, changing units, wardrobes, children's room furniture, mattresses, sleeping bags, bed linen.
- **Feeding and nursing:** bottles, teats, soothers, breast pumps, sterilisers, bottle warmers, high chairs, children's tableware and cutlery, drinking cups.

- **Care and hygiene:** bathtubs, changing mats, baby care accessories, nappy bins, thermometers, baby toiletries (cosmetics) and textile nappies.
- **Safety:** baby monitors, safety gates, corner and socket protectors, playpens, safety harnesses.
- **Carrying:** baby carriers, slings, hip seats, hiking child carriers.
- **Fashion:** baby and toddler clothing, outerwear, sleepwear, shoes, accessories, maternity wear.
- **Toys:** baby and toddler toys, plush, activity toys, wooden toys, ride-ons, balance bikes, learning and Montessori toys, bath toys, games for young children.

Baby food and disposable nappies are treated only where they influence distribution structures (e.g. drugstores), as they are covered by separate FMCG studies. Market figures are based on published statistics (Statistik Austria, Eurostat, Statista Market Insights), trade association information and company publications. Where no official data exist, estimates are derived from births, per-child spending benchmarks for the DACH region and per-capita comparisons with Germany; such figures are clearly marked as estimates. Company data were researched on company websites, imprints (Impressum), the Austrian Chamber of Commerce company directory (WKO Firmen A–Z) and other public sources. For data protection reasons, the directory lists only general company e-mail addresses and switchboard numbers, not names or personal e-mail addresses of buyers.

3. Market Overview and Market Volume

3.1 Demographic and economic framework

Austria had 76,873 live births in 2024 (preliminary), 0.9% fewer than in 2023, and the number continued to fall in 2025, when the crude birth rate reached 8.2 per 1,000 inhabitants (2024: 8.4) and the total fertility rate fell to about 1.29 children per woman. Vienna has the highest birth rate (9.3 per 1,000) and is the only province with a clearly positive natural balance; Burgenland has the lowest. For 2025, Statistik Austria reported the sixth consecutive year with more deaths than births.

Despite the declining birth numbers, spending per child remains high. Austria ranks among the wealthiest EU countries per capita, parents are on average older at first birth, the share of first-born children is high and grandparents are an important source of gift purchases. Families in Austria are strongly supported by public transfers (family allowance, childcare allowance), which stabilises consumer demand in the category.

3.2 Estimated market volume by segment

The following table summarises available statistics and estimates for the Austrian market at retail prices (incl. VAT unless stated otherwise).

Segment	Volume (approx.)	Source / basis
Baby apparel (0–2 years)	EUR 126 m (2025)	Statista Market Insights; forecast EUR 127 m in 2029, i.e. stagnating value
Children's apparel total (0–14 years)	approx. EUR 1.2 bn (2024)	Statista: approx. EUR 130 per capita; forecast EUR 1.23 bn in 2028 (CAGR +1.3%)
Toddler apparel and shoes (2–6 years)	EUR 250–300 m	Estimate derived from the apparel total and age-group shares
Baby equipment / hardgoods (prams, car seats, furniture, textiles, feeding, safety, carriers)	EUR 330–420 m	Estimate: approx. 75,000 births × DACH benchmark spending on first equipment and replacement purchases in the first 3 years
Toys for 0–6 years (incl. ride-ons, games for young children)	EUR 220–280 m	Estimate: approx. 40–45% of an overall Austrian toy market of about EUR 550–650 m (per-capita comparison with Germany)
Baby care (cosmetics only)	EUR 14 m (2025)	Statista Market Insights, forecast EUR 16 m in 2030 (CAGR +3.5%)

Segment	Volume (approx.)	Source / basis
Online sales, toys & baby products	EUR 200–400 m	Statista e-commerce segment (different vintages: EUR 198 m in 2022, strong growth forecast)
Total Kind + Jugend scope (0–6 years)	EUR 1.1–1.4 bn	Sum of segments, rounded; excludes baby food and disposable nappies

Growth outlook: in value terms the market is expected to grow slightly (approx. 0–2% per year nominal), driven by prices and premiumisation rather than volume. Trade research for the German-speaking region anticipates a rather weak development in 2025/26 due to falling birth numbers, cautious consumer sentiment, rising second-hand sales and competition from Asian online marketplaces.

3.3 Sales channels

Channel	Est. share	Comment
Drugstores (dm, BIPA, Müller)	15–20%	Dominant for care, feeding, small accessories, textiles basics and toys; strong private labels (e.g. dm “Babylove”); high frequency, low price points
Baby & toy specialists (chains)	15–20%	BabyOne, baby-walz, Smyths Toys; key channel for prams, car seats, furniture, premium brands; advice-driven
Independent specialist retailers	8–12%	Pram and car-seat specialists, organic baby shops, toy shops; brand-loyal, need service and exclusivity
Online (Amazon, brand shops, specialists)	25–30%	Growing; many Austrian consumers buy from German online shops; Amazon.de is a major channel
Food retail / discounters	8–10%	SPAR/Interspar, BILLA, HOFER, Lidl: promotional non-food weeks (“Aktionsware”), private label, seasonal toys
Furniture retail	5–7%	XXXLutz, Möbelix, mömax, IKEA: nursery furniture, mattresses, textiles
Fashion & value retail	15–20% of apparel	H&M, C&A, Name it, KiK, Takko, NKD, Pepco, Ernting’s family, Primark, department store Kastner & Öhler
Pharmacies	2–4%	Breast pumps, thermometers, premium care; supplied via pharmaceutical wholesalers

Shares are estimates across the whole Kind + Jugend scope and vary strongly by category (e.g. car seats are sold predominantly through specialists and online, care products predominantly through drugstores).

4. Key Players

4.1 Retail

- **dm drogerie markt Austria:** market leader in drugstores with the private label Babylove; covers care, feeding, textiles basics and toys. dm Austria is a separate company with its headquarters in Wals near Salzburg and its own listing decisions for Austria and several CEE countries.
- **BIPA (REWE Group) and Müller:** BIPA is the second drugstore chain; Müller (headquarters Ulm, Germany) operates large stores with extensive toy departments in Austria.
- **SPAR, REWE (BILLA, PENNY, ADEG), HOFER, Lidl:** food retailers with regular non-food promotions. Lidl Austria (headquarters Salzburg, more than 250 stores) and HOFER (ALDI SÜD Group, Sattledt) use weekly promotional programmes for baby equipment, textiles and toys, sourced largely as private label.
- **BabyOne:** specialist chain for babies and children up to 4 years with six stores in Austria; buying is centralised at the franchise headquarters in Münster (Germany). Strong private label LITTLE ONE.

- **baby-walz:** specialist retailer with stores in Austria and an Austrian online shop; central buying in Bad Waldsee (Germany).
- **Smyths Toys:** largest toy retail chain in Austria with 17 superstores (after taking over the former Toys“R”Us network) and a significant baby department.
- **XXXLutz Group:** Austria’s largest furniture retailer (Wels) with XXXLutz, Möbelix and mömax; important for nursery furniture, mattresses and textiles. IKEA is the second major player in children’s furniture.
- **Amazon and German online retailers:** a large proportion of Austrian online purchases in this category is made from German web shops; this is relevant for suppliers selling via marketplaces.

4.2 Brands and manufacturers

Domestic manufacturers include MAM (Vienna; soothers and bottles, a global brand), Naturkind (Upper Austria; ecological prams), Piatnik (Vienna; games and cards) and Stadlbauer (Salzburg; Carrera, Pustefix, Schildkröt, exclusive sales agency of Playmobil in Austria). International brands dominating the shelves include Cybex, Maxi-Cosi, Britax Römer, Joie, Nuna, ABC Design, Stokke, Hauck, Bugaboo, Thule, Philips Avent, NUK, Medela, Ergobaby, LEGO, Playmobil, Ravensburger, HABA, VTech, Hape, Sterntaler, Sanetta and Name it. Car-seat purchases are strongly influenced by the joint crash tests of the Austrian automobile club ÖAMTC with ADAC and Stiftung Warentest.

5. Market Opportunities for Foreign Suppliers

5.1 Branded products

Austrian consumers are brand-aware, quality-oriented and receptive to products with a clear story (design, sustainability, origin, test results). New brands can succeed if they offer a distinctive product advantage and support the trade with German-language point-of-sale material, training for sales staff, reliable spare-parts and warranty service and attractive margins. Because the market is small, Austria is usually developed together with Germany (DACH strategy); a brand that has succeeded in Germany or in comparable markets (Netherlands, Scandinavia, Switzerland) is significantly easier to list in Austria.

5.2 Private label and no-name products

Private label is strong in drugstores (Babylove at dm), discounters (HOFER, Lidl promotional ranges) and specialists (LITTLE ONE at BabyOne). Retailers look for manufacturers who can supply according to EU standards with complete test reports, meet social audit requirements (e.g. amfori BSCI, ICTI Ethical Toy Program) and deliver reliably in promotional volumes. Manufacturers from Asia, Turkey and Eastern Europe compete on price; European producers compete on lead time, flexibility and sustainability credentials.

5.3 Product groups with particularly good sales prospects

- **Sustainable baby textiles:** organic cotton (GOTS), wool/silk bodies, sleeping bags with TOG rating, muslin products, OEKO-TEX-certified bed linen; Austria has one of the highest shares of organic consumption in the EU.
- **Wooden, Montessori and learning toys:** learning towers, climbing triangles (Pikler), wooden activity toys, magnetic building tiles, sensory toys.
- **Premium and travel strollers:** lightweight cabin-size buggies, e-strollers with electric push assistance, twin/sibling strollers; retailers report strong demand for travel buggies with aircraft approval.
- **Car seats:** i-Size reboarders and 360° rotating seats with good ÖAMTC/ADAC test results; R44 seats can no longer be sold since September 2024, which drives replacement demand.

- **Outdoor and alpine family products:** bike trailers, hiking child carriers, children's ski helmets, snow suits and functional outerwear, sledges, balance bikes and scooters.
- **Children's traditional wear (Tracht):** dirndls and lederhosen for children are a distinctive Austrian niche with stable seasonal demand.
- **Smart safety:** video baby monitors with app, breathing/sleep monitors (subject to medical-device rules where claims are made), safety gates without drilling.
- **Feeding:** silicone and stainless-steel tableware, suction plates, drinking cups, bottle preparation devices, food-grade storage.
- **Nursery furniture:** convertible cots, bedside cribs, space-saving solutions for urban apartments (Vienna, Graz, Linz).
- **Gifts and tourism-driven products:** soft toys, gift sets and souvenir-style baby products for tourists in Vienna, Salzburg and alpine resorts (tax-free shopping is offered by specialists).
- **Rental and re-commerce ready products:** durable, repairable hardgoods with spare parts; second-hand trading is increasing.

5.4 Success factors and barriers

- **Success factors:** German-language packaging and manuals, EU test reports from accredited labs, competitive DACH price positioning (Austrian retail prices are usually aligned with Germany), marketing support, fast delivery from an EU warehouse, low minimum order quantities for specialists.
- **Barriers:** small volumes, centralised buying abroad for many chains, strong incumbent brands, high listing and marketing costs at large retailers, price transparency with Germany, strict product liability and recall management requirements.

6. Market Access Requirements

6.1 Requirements for all suppliers (EU law applicable in Austria)

- **General Product Safety Regulation (EU) 2023/988 (GPSR):** applies since 13 December 2024 to all consumer products not covered by specific rules; requires risk assessment, technical documentation, traceability, product and manufacturer identification and an economic operator established in the EU; online offers must display safety information.
- **Toys:** Toy Safety Directive 2009/48/EC with CE marking, EU declaration of conformity and EN 71 series (mechanical, flammability, chemical migration, etc.); in Austria implemented via the Spielzeugverordnung under the food safety and consumer protection act (LMSVG), with market surveillance by the food/consumer inspection authorities. The new EU Toy Safety Regulation adopted in 2025 will replace the directive after a transition period and introduces a digital product passport and stricter chemical rules (e.g. PFAS, bisphenols) – suppliers should plan for it now.
- **Childcare articles (standards used as benchmark under GPSR):** EN 1888 (wheeled child conveyances), EN 716 (cots), EN 1130 (cribs), EN 14988 (high chairs), EN 12221 (changing units), EN 1930 (safety gates), EN 13209 (carriers), EN 16781 (sleeping bags), EN 14350 (drinking equipment), EN 1400 (soothers), EN 12586 (soother holders), EN 14036 / EN 12227 (playpens).
- **Car seats:** type approval according to UN Regulation No. 129 (i-Size) with approval mark; R44 seats may no longer be placed on the market.
- **Chemicals:** REACH (EC) 1907/2006 incl. Annex XVII restrictions (phthalates, PAHs, azo dyes, nickel etc.) and SVHC communication obligations; POPs Regulation; CLP for mixtures.
- **Food contact materials:** Regulation (EC) 1935/2004, Regulation (EU) 10/2011 for plastics, good manufacturing practice (EC) 2023/2006; ban on BPA in food contact materials (Regulation (EU) 2024/3190, with transition periods).

- **Textiles:** Textile Labelling Regulation (EU) 1007/2011 (fibre composition), EN 14682 (cords and drawstrings on children's clothing); voluntary but commercially expected: OEKO-TEX Standard 100, GOTS.
- **Cosmetics:** Cosmetics Regulation (EC) 1223/2009 (responsible person in the EU, CPNP notification, safety assessment) for baby care products.
- **Electrical products:** LVD, EMC, RED (for connected baby monitors incl. cybersecurity requirements since August 2025), RoHS; WEEE registration in Austria (Elektroaltgeräteverordnung) and batteries under the EU Batteries Regulation (EU) 2023/1542.
- **Packaging:** EU Packaging and Packaging Waste Regulation (EU) 2025/40, applicable from August 2026; in Austria, participation in a licensed collection and recovery system under the Verpackungsverordnung; foreign distance sellers without an Austrian establishment must appoint an authorised representative for packaging and WEEE obligations.
- **Language and labelling:** safety warnings, instructions for use and labelling in German; manufacturer and importer name and address; batch/serial number; age warnings on toys.
- **Deforestation and sustainability rules:** EUDR obligations for wood-based products (e.g. wooden furniture and toys) according to the applicable EU timeline; corporate sustainability due-diligence expectations of large retailers.

6.2 Suppliers from the EU (and EEA)

Goods from other EU member states circulate freely without customs formalities. Suppliers need an Austrian VAT registration only if they sell and deliver directly to consumers above the EU distance-selling threshold (EUR 10,000 EU-wide; One-Stop-Shop procedure available) or hold stock in Austria. B2B deliveries are invoiced as intra-Community supplies (reverse charge). Extended producer responsibility (packaging, WEEE, batteries) must be fulfilled for the Austrian market by the party placing the goods on the Austrian market; for distance sales an authorised representative is required. EEA suppliers (Norway, Iceland, Liechtenstein) apply the same product rules; customs formalities apply but no duties on originating industrial goods.

6.3 Suppliers from non-EU European countries

- **Switzerland:** free trade agreement – industrial goods of Swiss origin are duty-free with proof of preferential origin; customs declaration and import VAT (20%) apply. The EU-Swiss mutual recognition agreement does not cover all product groups; EU conformity assessment and an EU economic operator are required.
- **United Kingdom:** EU–UK Trade and Cooperation Agreement – zero tariffs for goods meeting the rules of origin (statement on origin); UKCA and CE diverge, so products must meet EU requirements and have an EU-based responsible operator.
- **Turkey:** customs union with the EU for industrial goods: free circulation with the A.TR movement certificate (no duties), but import VAT and full compliance with EU product legislation.
- **Western Balkans, Ukraine, Moldova, Georgia:** stabilisation and association or DCFTA agreements provide duty-free access for most industrial goods with proof of origin.

6.4 Suppliers from outside Europe

Imports from outside Europe (e.g. China, India, Vietnam, Korea, USA, Brazil) require an EU EORI number, customs clearance, payment of customs duties according to the Common Customs Tariff and import VAT of 20% (deductible for VAT-registered importers). Preferential duties apply where free trade agreements exist (e.g. Vietnam, Korea, Japan, Canada, Singapore, Mexico, Chile) or under the Generalised Scheme of Preferences, subject to rules of origin. A responsible economic operator in the EU (importer, authorised representative or fulfilment service provider) is mandatory for toys, most childcare articles and electrical products. Customs authorities and market surveillance frequently check toys and childcare articles from third countries; missing CE marking, German warnings or test reports lead to

detention and rejection. The EU is also abolishing the EUR 150 duty exemption for low-value consignments, which affects direct-to-consumer shipments from third countries.

Indicative EU third-country (MFN) duty rates for typical products (to be verified against the current TARIC for the exact code):

Product (HS heading)	MFN duty	Comment
Toys, dolls, puzzles, plush (9503)	0%	Import VAT 20% applies
Prams, strollers and parts (8715)	1.7%	
Car seats (9401 20)	3.7%	Also UN R129 approval required
Children's furniture of wood (9403 50 / 9403 60)	0%	EUDR relevance for wood
Mattresses (9404 21 / 9404 29)	3.7%	
Babies' garments, knitted (6111)	12%	Frequently reduced by preferences (e.g. GSP, FTAs)
Babies' garments, woven (6209)	10.5%	
Plastic tableware, bottles (3924)	6.5%	Food contact compliance
Baby monitors (8517 / 8525)	0%	RED, WEEE
Baby care cosmetics (3304 / 3401)	0%	CPNP notification

7. Recommended Market Entry Strategy

- **Step 1 – Compliance package:** EU test reports (accredited lab), declaration of conformity, German instructions, GPSR-compliant labelling, EU responsible operator, EPR registrations for packaging and WEEE.
- **Step 2 – Choose the route:** private label via retailers that import directly (discounters, drugstores, specialists, value chains); brand distribution via an Austrian distributor or agency (toys, fashion) or via a German DACH distributor; or direct listing with specialists and online platforms.
- **Step 3 – Target buying centres:** for many chains present in Austria, the buying decision is made in Germany or at group level (see directory). Contact the central purchasing department, not the Austrian store.
- **Step 4 – Trade fairs:** Kind + Jugend (Cologne, September) and Spielwarenmesse (Nuremberg, January/February) are the most important meeting points for Austrian buyers; ISPO (Munich) is relevant for outdoor/kids sports.
- **Step 5 – First contact:** qualified e-mail to the general address with a short product presentation, price level and compliance status; a call to the switchboard to identify the responsible category buyer; LinkedIn research to identify the buyer by function; use of supplier registration forms where available.
- **Step 6 – Launch:** DACH price list, marketing budget for retail promotions, sales staff training, sample stock, spare-parts and warranty service in the EU.

8. Directory of Importers, Distributors and Directly Importing Retailers

The directory is structured by type of company. For each company, the website is given; where published, a general e-mail address and the switchboard telephone number are listed, together with a link to a supplier registration form if one exists. The column "First-contact data" also indicates whether names or e-

mail addresses of buyers or managing directors are published on the website (without reproducing them). Where no general e-mail address is published, first contact should be made through the contact form, by calling the switchboard to identify the responsible buyer, or via LinkedIn. Contact data reflect public sources at the time of research and should be verified before larger mailing campaigns.

Legend (type): SPEC = specialist for baby/toddler products; GEN = baby/toys as one category among others in non-food; IMP = importer/distributor; AGY = sales agency; RET-DI = retailer importing directly; FULL = full-range; FOCUS = specialised in certain product groups.

8.1 Baby and toddler specialists – retail chains and specialist retailers

Company	Profile & relevant categories	Type / role	First-contact data
BabyOne (Austria)	Specialist chain for babies and children up to 4 years; 6 stores in Austria plus online shop. Full range: prams, car seats, furniture, textiles, feeding, care, toys; private label LITTLE ONE. Central buying at the franchise headquarters in Münster (Germany).	SPEC · RET-DI · FULL	Web: www.babyone.at E-mail: service@babyone.at Phone: +49 251 78 87 0 (headquarters Münster); Austrian hotline +43 720 204025 Note: No public supplier form found; approach central purchasing in Münster. Management named in imprint; no buyer e-mails published.
baby-walz (Austria)	Baby specialist with stores in Austria and Austrian online shop; prams, car seats, nursery, maternity and baby fashion, toys. Central buying in Bad Waldsee (Germany).	SPEC · RET-DI · FULL	Web: www.baby-walz.at Note: Contact via the website contact form or central purchasing in Germany; no buyer e-mails published.
Smyths Toys Austria	Largest toy superstore chain in Austria (17 stores) with a significant baby department (prams, car seats, feeding, nursery). Group headquarters in Galway (Ireland); buying for DACH is centralised.	SPEC (toys/baby) · RET-DI · FULL	Web: www.smythstoys.com/at E-mail: Kundenservice.AT@smythstoys.com (general) Note: No switchboard published; for supplier enquiries use the contact form and address the DACH buying team. No buyer names on website.
Kindermaxx	Online shop and specialist store in Saalfelden (Salzburg) with international shipping; prams (Bugaboo, Nuna, Thule, Moon), children's furniture, wooden toys, textiles (OEKO-TEX, organic). Focus on sustainable brands.	SPEC · RET-DI · FOCUS (premium/eco)	Web: www.kindermaxx.at Note: Contact details on the website contact page; founders named on the website; no buyer e-mails.
Kinderwagenshop Cindy	Baby specialist store in Vienna since 1989 and online shop; prams incl. twin strollers, car seats, cots, high chairs, accessories; brands such as Cybex, Joie, Nuna, Mima, Uppababy, Mast Swiss; own label models.	SPEC · RET-DI · FOCUS (on the move, nursery)	Web: kinderwagen-cindy.at Phone: +43 1 6023407 Note: Contact form on website; no buyer e-mails published.
Die Kinderwelt	Specialist for premium prams and children's beds; direct partnerships with brands such as Junama and Anex.	SPEC · RET-DI · FOCUS (prams, beds)	Web: diekinderwelt.at Note: Contact via website; open to direct brand partnerships.
Babypromenade Pasching	Baby store near Linz: prams, carriers, car seats, nursery furniture, sleep, toys, bike trailers, outdoor accessories; dealer of Naturkind; promotes innovations (e.g. e-strollers).	SPEC · FULL	Web: www.babypromenade.at Note: Contact details on website.
Mutter und Kind (Salzburg)	Specialist for maternity wear and organic baby equipment and fashion up to 6 years, mainly European products in organic quality.	SPEC · FOCUS (fashion, textiles)	Web: www.mutterundkind.co.at Note: Owner-managed; contact via website.

Company	Profile & relevant categories	Type / role	First-contact data
Herzilein Wien	Children's fashion and gift boutiques in central Vienna (two stores).	SPEC · FOCUS (fashion, gifts)	Web: herzilein-wien.at E-mail: shop@herzilein-wien.at Phone: +43 676 6163188

8.2 Importers, distributors and sales agencies

Company	Profile & relevant categories	Type / role	First-contact data
Stadlbauer Marketing + Vertrieb GmbH	Leading Austrian toy group (Puch near Salzburg); owner of Carrera, Pustefix, Schildkröt, Baufix; distributes third-party brands and licensed products (e.g. Bburago, Disney/Nintendo licences) in Austria and Germany; exclusive sales agency for Playmobil in Austria. Categories: vehicles, wooden toys, water toys, plush, electronic toys.	IMP · GEN (toys) · FULL (toys)	Web: www.stadlbauer.at E-mail: office@stadlbauer.at Phone: +43 662 88921-0 Note: No supplier form found; imprint lists company data only, no buyer e-mails.
Wiener Spielkartenfabrik Ferd. Piatnik & Söhne	Largest Austrian games publisher (Vienna) with sales subsidiaries in Germany, Czech Republic and Hungary; games, puzzles, children's games; also distributes games of partner publishers. Relevant for games and puzzles for young children.	IMP/ manufacturer · FOCUS (games, puzzles)	Web: www.piatnik.com E-mail: info@piatnik.com Phone: +43 1 914 41 51 Submissions: piatnik.com/fuer-autoren Note: Managing directors named on contact page, reachable via the general e-mail.
kids4fun (aconnect e.U.)	Toy wholesaler registered as Spielwarengroßhändler in Ried im Innkreis (Upper Austria).	IMP · FOCUS (toys)	Web: kids4fun.at E-mail: info@kids4fun.at Phone: +43 676 7715866
KIDSFASHION Austria	Sales agency for children's fashion 0–16 years in Austria with showroom in St. Veit an der Glan (Carinthia); represents international labels (e.g. BOSS, HUGO, Kenzo, Timberland, Billieblush, Jeune Premier, Chicco fashion).	AGY · SPEC · FOCUS (fashion, schoolbags)	Web: www.kidsfashion.cc E-mail: kidsfashion@a1.net Phone: +43 664 3402545 Note: Agency principals named on website with mobile numbers; suited for brands seeking representation to independent kids' fashion retailers.
Fashion Mall Salzburg (agency centre)	Order centre in Salzburg with around 57 fashion agencies and showrooms, including agencies for children's wear; entry point for foreign fashion brands looking for an Austrian agent.	AGY (platform) · GEN (fashion)	Web: fashionmall.at/agenturen Note: Agency list online; contact the individual agencies via the listed data.

Note: Austria has only a few independent full-range importers for baby hardgoods. Most international pram, car-seat and nursery brands are distributed by their own German/DACH subsidiaries or by German distributors who also serve Austrian retailers. For brands without German representation, a DACH distributor based in Germany is often the most efficient route; the German market entry study for baby and toddler products contains a corresponding list.

8.3 Large retailers importing directly – food, drugstore and general merchandise (baby/toys as one category)

Company	Profile & relevant categories	Type / role	First-contact data
dm drogerie markt GmbH (Austria)	Market-leading drugstore; private label Babylove (care, feeding, textiles basics, accessories) and branded toys/baby articles. Austrian company with own listing for Austria and CEE countries; headquarters Wals near Salzburg.	GEN · RET-DI (private label)	Web: www.dm.at Phone: +43 662 858-0 Note: Supplier enquiries via the corporate contact channel; no buyer e-mails published.
REWE International AG (BILLA, BIPA, PENNY, ADEG)	Second-largest food retailer; BIPA drugstores with baby care, accessories and toys; BILLA/PENNY with promotional non-food. Headquarters Wiener Neudorf.	GEN · RET-DI	Web: www.rewe-group.at Phone: +43 2236 600-0 Note: Check the corporate website for supplier information; buyers not named.
SPAR Österreichische Warenhandels-AG (SPAR, EUROSPAR, INTERSPAR)	Market leader in Austrian food retail; INTERSPAR hypermarkets carry baby equipment, textiles and toys; seasonal and promotional non-food. Headquarters Salzburg.	GEN · RET-DI	Web: www.spar.at Phone: +43 662 4470-0 Note: Supplier information on corporate website; no buyer e-mails published.
HOFER KG (ALDI SÜD Group)	Leading discounter; weekly promotional non-food (baby equipment, children's textiles, toys), mostly private label sourced via ALDI SÜD international buying. Headquarters Sattledt.	GEN · RET-DI (private label)	Web: www.hofer.at E-mail: kundenservice@hofer.at (general) Phone: +43 7244 8000 Note: Non-food sourcing is largely coordinated at ALDI SÜD group level.
Lidl Österreich GmbH	Discounter with more than 250 stores; promotional non-food themes for babies and children (Lupilu, Pepperts private labels); sourcing via Lidl international buying. Headquarters Unter der Leiten 11, 5020 Salzburg.	GEN · RET-DI (private label)	Web: www.lidl.at Phone: +43 662 442833 Note: Non-food private label sourced centrally by the Lidl group; press contacts published, no buyer e-mails.
Müller (Austria)	Drugstore/department store chain with large toy, stationery and baby departments in Austria; central buying at Ulm headquarters (Germany).	GEN · RET-DI	Web: www.mueller.at Phone: +49 731 174-0 (headquarters Ulm) Note: Approach central purchasing in Ulm.
XXXLutz KG (XXXLutz, Möbelix, mömax)	Largest furniture retail group in Austria (headquarters Wels); nursery and children's furniture, mattresses, textiles, small baby equipment; strong private label programmes.	GEN · RET-DI	Web: www.xxxlutz.at E-mail: info@xxxlgroup.com Phone: +43 50 111 1000 Note: Central buying in Wels; no buyer e-mails published.
IKEA Austria	Second major furniture player; children's furniture, textiles and toys. Product development and sourcing are centralised at IKEA of Sweden and the IKEA supply organisation.	GEN · RET-DI (own design)	Web: www.ikea.com/at Note: New suppliers are selected through the global IKEA supplier organisation, not locally.
Kastner & Öhler	Department store group (headquarters Graz) with toy and children's departments; regional relevance in Styria and Carinthia.	GEN · RET-DI	Web: www.kastner-oehler.at Phone: +43 316 870-0
Tchibo / Eduscho (Austria)	Weekly changing non-food themes incl. baby and children's textiles and accessories; private label sourcing centralised in Hamburg.	GEN · RET-DI (private label)	Web: www.tchibo.at Phone: +49 40 6387-0 (headquarters Hamburg)
Libro / Pagro Diskont	Stationery, books and toys chains with nationwide store networks; toys and games for young children, seasonal items.	GEN · RET-DI	Web: www.libro.at Note: Contact via website; buyers not named.

8.4 Value and discount chains with central buying outside Austria

These chains operate numerous stores in Austria but buy centrally at their group headquarters. They are relevant for private-label baby and children's textiles, basic equipment and toys in large volumes.

Company	Profile & relevant categories	Type / role	First-contact data
KiK	Textile discounter with a large baby and children's range; toys and accessories. Central buying in Bönen (Germany).	GEN · RET-DI (private label)	Web: www.kik.at Phone: +49 2383 95-0 (headquarters)
Takko Fashion	Value fashion chain with baby and children's clothing; central buying in Telgte (Germany).	GEN · RET-DI (private label)	Web: www.takko.com Phone: +49 2504 923-0 (headquarters)
Ernsting's family	Family fashion chain with strong baby/children's share; central buying in Coesfeld-Lette (Germany).	GEN · RET-DI (private label)	Web: www.ernstings-family.at Phone: +49 2546 77-0 (headquarters)
NKD	Value chain for textiles and home; children's clothing and toys; central buying in Bindlach (Germany).	GEN · RET-DI	Web: www.nkd.com Note: Contact via corporate website.
Pepco	Pan-European discounter with children's clothing, toys and home; headquarters Poznań (Poland).	GEN · RET-DI	Web: www.pepco.eu Note: Supplier contact via corporate website.
Action	Non-food discounter with toys, baby accessories and seasonal items; headquarters Zwaagdijk (Netherlands).	GEN · RET-DI	Web: www.action.com Note: Supplier contact via corporate website.
TEDi	Non-food discounter with toys and small baby items; headquarters Dortmund (Germany).	GEN · RET-DI	Web: www.tedi.com Note: Supplier contact via corporate website.

8.5 Pharmacy channel

Company	Profile & relevant categories	Type / role	First-contact data
Herba Chemosan Apotheker-AG	Market leader in pharmaceutical wholesale in Austria (market share approx. 43%), supplying the large majority of Austrian pharmacies from seven distribution centres; relevant for breast pumps, thermometers, nasal aspirators, premium baby care and nursing products sold in pharmacies.	GEN · IMP (wholesale)	Web: www.herba-chemosan.at Phone: +43 1 401 04-0 Note: Listing via purchasing department; no buyer e-mails published.

Further pharmaceutical wholesalers (e.g. PHOENIX, Kwizda) supply pharmacies in parallel; products with medical claims fall under the Medical Device Regulation (EU) 2017/745.

8.6 Associations and useful institutions

Company	Profile & relevant categories	Type / role	First-contact data
Bundesgremium des Papier- und Spielwarenhandels (WKO)	National trade association of the stationery and toy retail trade within the Austrian Chamber of Commerce; organises initiatives of the independent toy trade (e.g. Kindertag) with lists of participating toy shops – useful for identifying independent retailers.	Association	Web: www.papierundspiel.at E-mail: papier.spiel@wko.at Phone: +43 5 90 900 3320

Company	Profile & relevant categories	Type / role	First-contact data
WKO Firmen A–Z	Official company directory of the Austrian Chamber of Commerce; search by trade (e.g. Spielwarengroßhändler, Babyartikel) for further importers and wholesalers.	Directory	Web: firmen.wko.at
Kind + Jugend / Spielwarenmesse	Leading trade fairs for baby/toddler products (Cologne) and toys (Nuremberg), attended by Austrian buyers.	Trade fairs	Web: www.kindundjugend.de Toys: www.spielwarenmesse.de

9. Conclusion

Austria rewards suppliers who combine proven product quality with full EU compliance, German-language support and a clear positioning in either the premium/sustainable segment or in reliable private-label production. Because volumes are limited and many decisions are made in German or international buying centres, the Austrian market should be approached as part of a DACH strategy: listing with the central buyers of the chains active in Austria, representation through Austrian toy and fashion distributors or agencies, and targeted work with independent specialists who value exclusive, innovative products. Suppliers from outside the EU should first secure an EU-based responsible economic operator and the necessary test documentation, as this is the most frequent reason for failed listings.

10. Sources and Methodology

10.1 Methodology

- **Research approach:** desk research conducted in September 2026, based on official statistics, market research databases, trade association publications, press releases, company websites and legal texts. No primary interviews with retailers were conducted.
- **Market sizing:** where official or published market data exist (births, baby and children's apparel, baby care, e-commerce toys & baby), these were used directly. For segments without published data (baby hardgoods, toys for 0–6 years, total Kind + Jugend scope), volumes were estimated top-down and bottom-up: (a) number of births multiplied by typical DACH spending on first equipment and replacement purchases in the first three years, and (b) per-capita comparison with the German toy market adjusted for Austrian purchasing power and age structure. All estimates are rounded, stated as ranges and marked as estimates.
- **Channel shares:** estimated on the basis of retailer store networks, published company information, e-commerce data and the structure of comparable DACH markets; they are indicative only.
- **Selection of companies:** companies were identified through retailer and brand websites, the WKO company directory (Firmen A–Z, trade categories such as toy wholesalers), trade association lists, fashion order centres and press reports. Only companies with their own website or direct company contact data were included. Companies were classified by type (specialist vs. generalist; importer/distributor, agency, directly importing retailer; full-range vs. focused).
- **Contact data:** website, general e-mail address and switchboard number were taken from company websites, imprints (Impressum), contact pages, press releases or the WKO directory. For some larger retail groups the switchboard numbers reflect the known central numbers of the headquarters and were not additionally confirmed on the website during research; they should be verified before larger campaigns. Where no general e-mail address or switchboard number was published, the preferred contact route (contact form, central purchasing, LinkedIn) is indicated.
- **Data protection:** in line with GDPR principles, no names or personal e-mail addresses of buyers or managing directors are reproduced. The directory only indicates whether such information is published on the company website.

- **Legal information:** summaries of EU and Austrian requirements and customs duties are simplified overviews and do not replace legal advice or a check of the current TARIC classification and the latest version of the legal acts.
- **Limitations:** company structures, store networks and contact data change frequently; information reflects public sources as of September 2026.
